

### **1.1.6 Age distribution, by sex and province – 2018, 2019, 2020**

From 2018 to 2020, a slight improvement with respect to the right age for the children enrolled in early childhood education aged between 4 to 5 years with overall improvement of 3% representing an increase of 3% for females and 2% for males. We have witnessed fluctuation in the right age enrollment between 2019 and 2020, nevertheless the overall changes of the total enrollment of students were higher in comparison to the profile of students in 2018.

Looking into the provincial level, only two provinces recorded slight decrease in respect to the percentage of enrollment at the right age, which were Shefa in respect to female enrollment of 2% and Torba for 1% females and 7% males.
