

1.3.7. Age distribution, by sex, Year level, province – 2018, 2019, 2020

Although the age profile of the children enrolled in secondary education with respect to the right age of secondary education between 12 to 19 is calculated more than 90% (see indicator 1.3.6 above), the year level disaggregation reveals that the rates of each year level are much lower. The trends of the rate of education at the right age within secondary education from 2018 to 2020 differs across the year levels and genders with respect to the direction of the trends and the size of changes in the rates (see chart – 1.3.7.a)

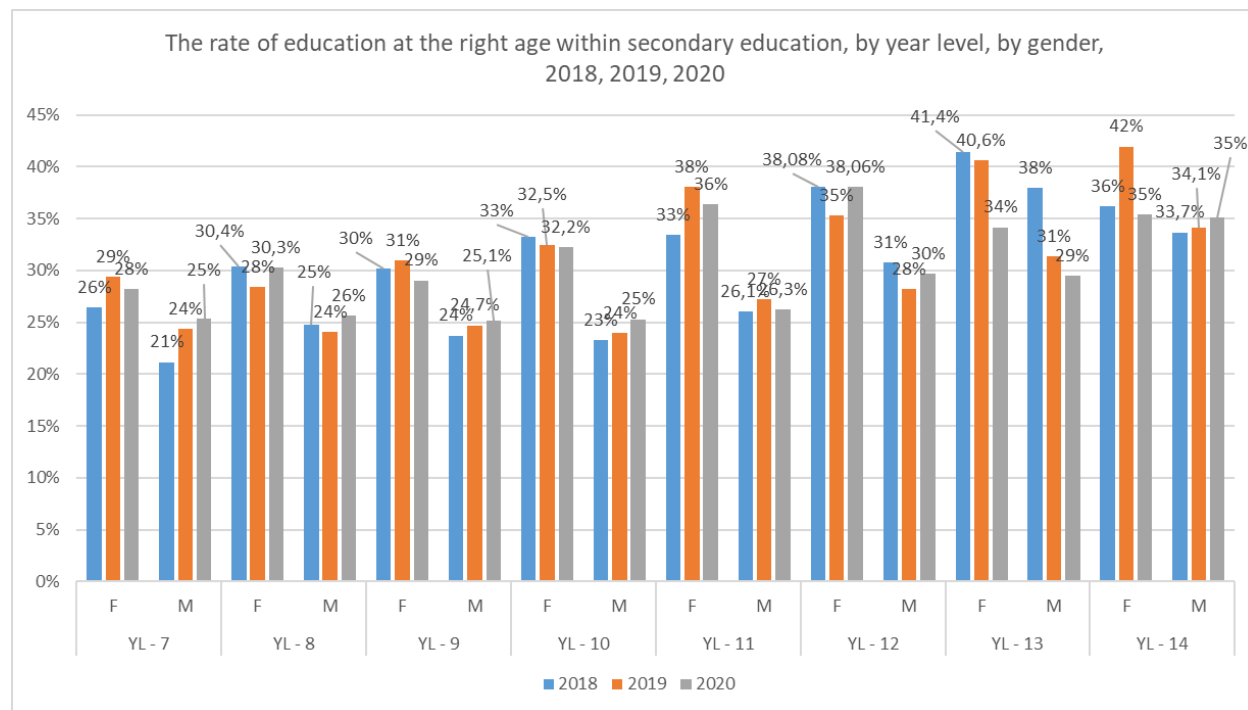

Chart 1.3.7 a

Similar to the trends observed at country level, the changes in the rate of education at the right within each year level of secondary education from 2018 to 2020 differs across the provinces and genders with respect to the direction and the magnitudes of the changes in the rates (see chart 1.3.7.b ,c, d and e)

The rate of education at the right age within year level 7 and 8 of secondary education, by province, by gender, 2018, 2019, 2020

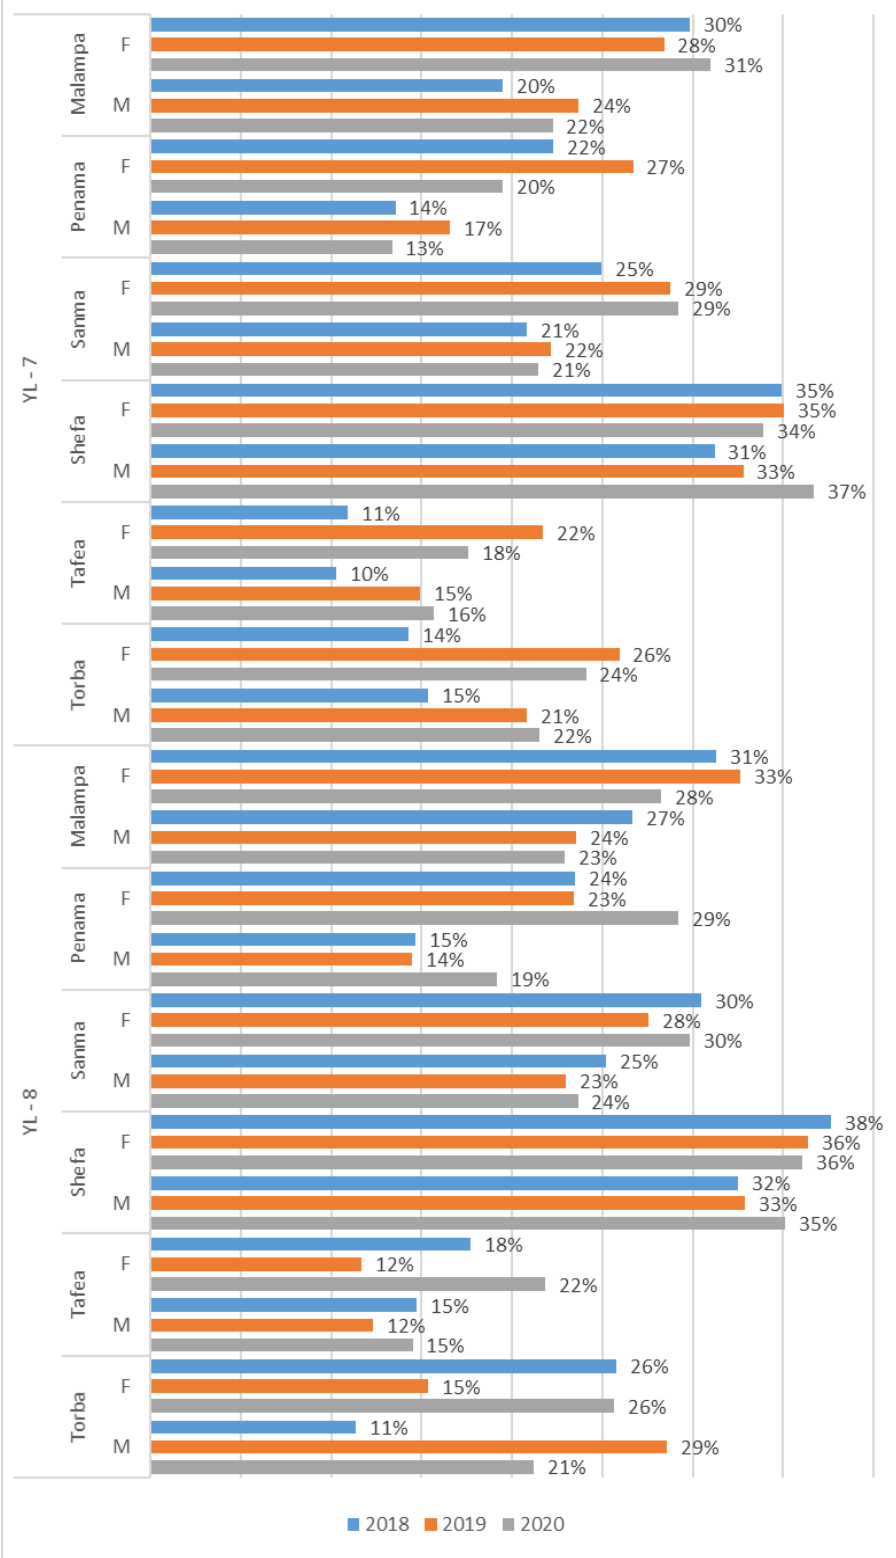

Chart 1.3.7 b

The rate of education at the right age within year level 9 and 10 of secondary education, by province, by gender, 2018, 2019, 2020

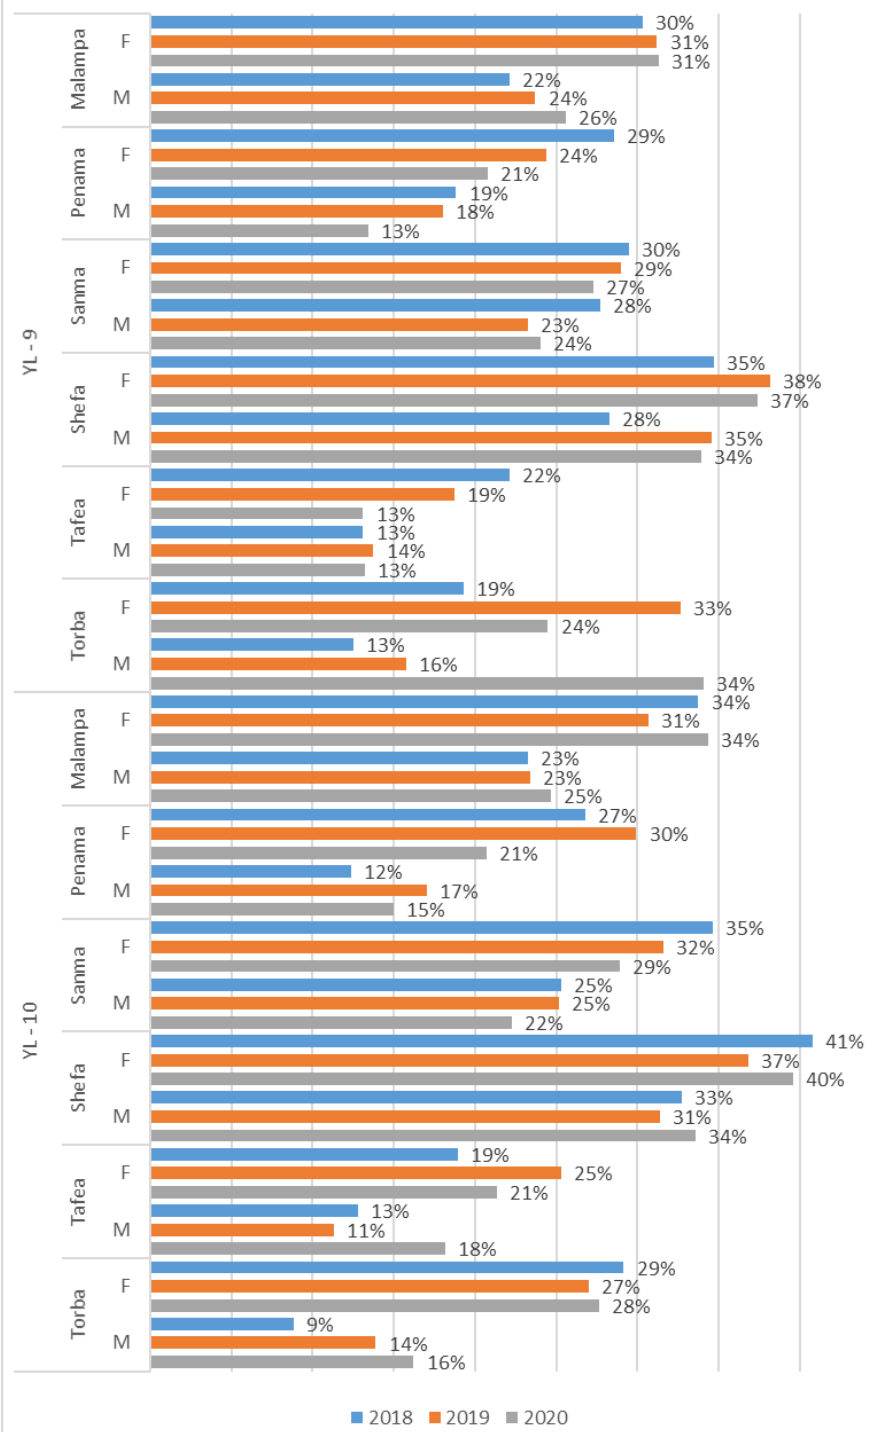

Chart 1.3.7 c

The rate of education at the right age within year level 11 and 12 of secondary education, by province, by gender, 2018, 2019, 2020

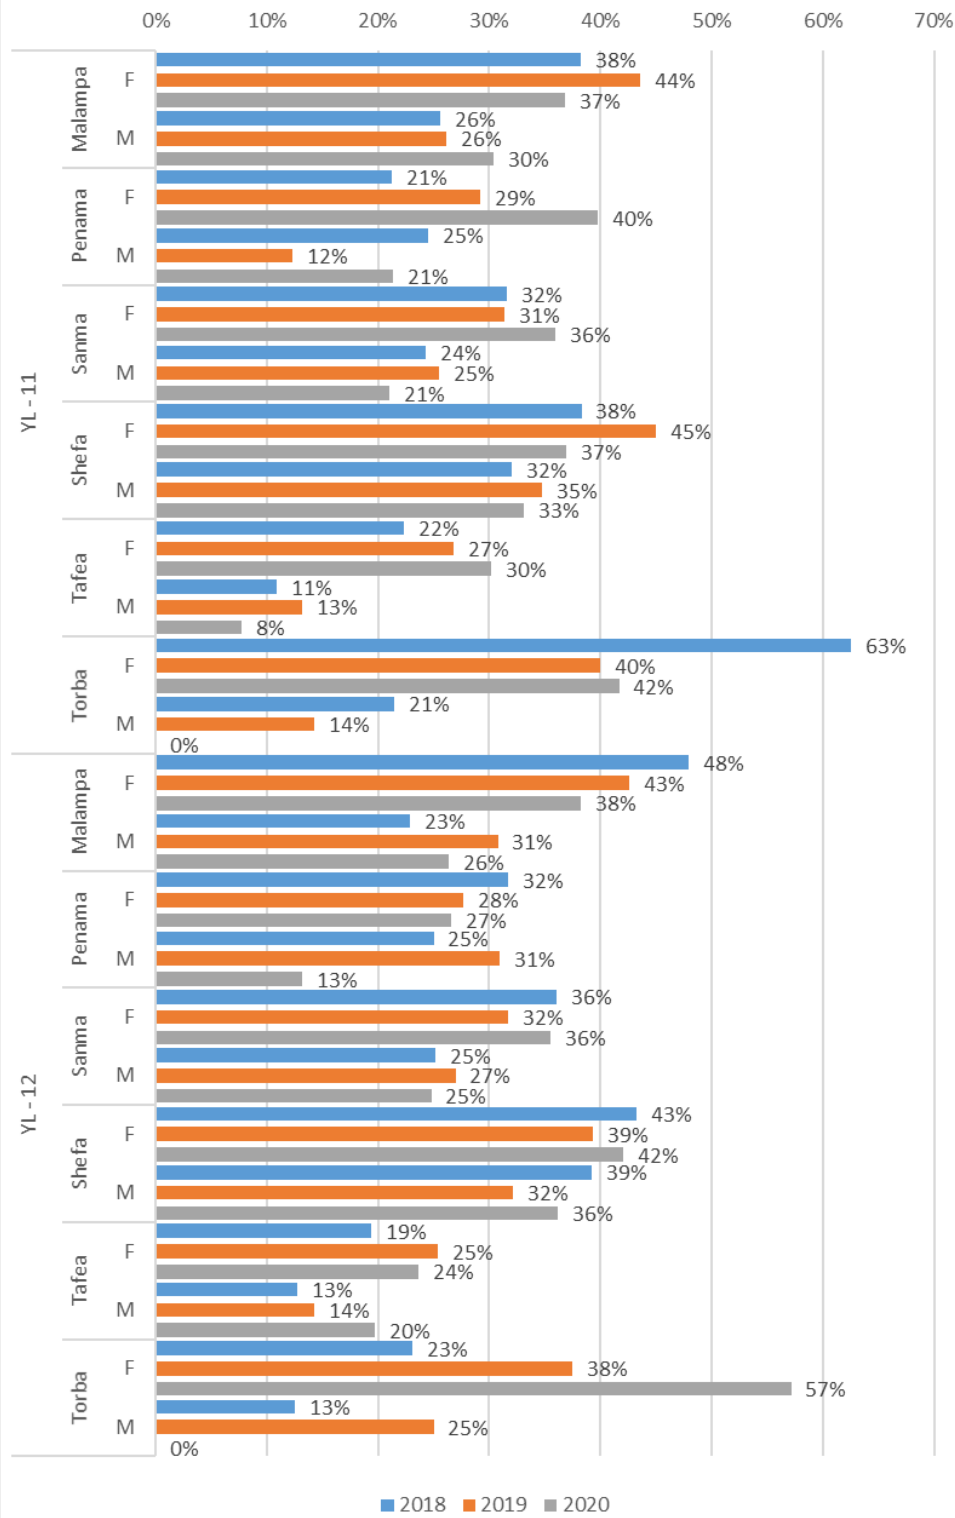

Chart 1.3.7 d

The rate of education at the right age within year level 13 and 14 of secondary education, by province, by gender, 2018, 2019, 2020
