

1.3.8. Age distribution, by sex, education authority and province – 2018, 2019, 2020

Age profile of the children enrolled in secondary education with respect to the education at the right age had a setback from 2018 to 2020 for each type of education authority types and genders except females enrolled in private schools, where an improvement is observed when 2018 and 2020 rates are compared (see chart - 1.3.8.a)

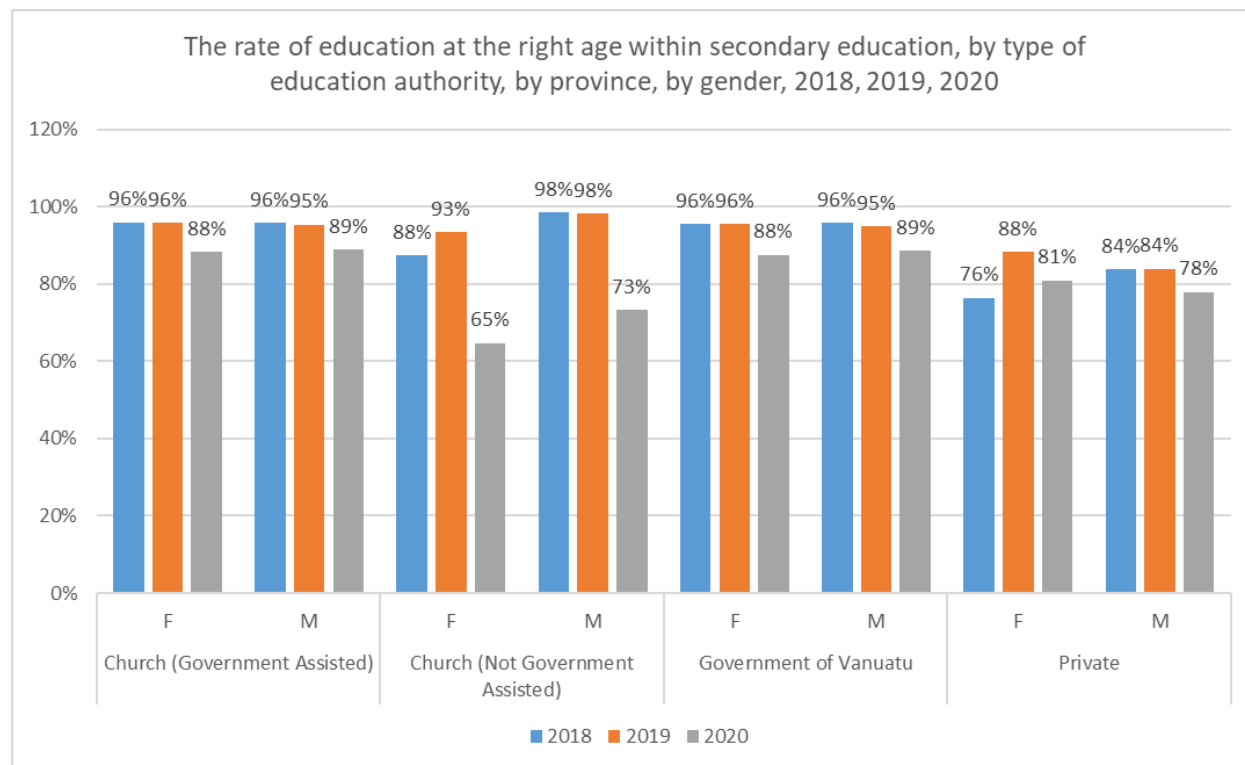

Chart 1.3.8 a

The country level trends in the rate of education at the right age observed within the education authorities; Government of Vanuatu and Government assisted Churches, are valid at province level for both of the education authorities with differing sizes of change in the rates (see chart - 1.3.8.b and c).

The country level trends observed on the age profile of children enrolled in schools governed by Churches that are not assisted by the government are not valid for each province and the trends change direction and the sizes of changes. Regarding the private schools, country level trends are valid for the provinces where private schools are present.

The rate of education at the right age within secondary education by two main education authorities, Government assisted Churches and Government of Vanuatu, by province, by gender, 2018, 2019, 2020
