Tok Tankiu

Tok save mo tok tankiu i stap go long evri man mo woman we oli gat intres blong givhan blong raetem pepa ia wetem help blong ol Kodineta long Provins, tija mo ol narafala man we oli kea.

Wanem pepa ia i stap tokbaot hemi kamaot long ol narafala pepa we Ministri blong Eli Jaelhud Kea mo Edukesen (EJKE) hemi bin raetem finis. Yumi no save gat pepa ia sapos yumi no bin gat gudfala sapot mo save blong Jennifer James, Nasonal Kodineta blong Kea mo Edukesen blong ol smol pikini-ni. Toksave i stap go tu long gudhat mo sapot blong Jessie Dick (Daerekta Jenerol blong Edukesen) mo Roy Obed (Daerekta blong Edukesen Seves).

Oli piperem pepa ia wetem help blong Jennifer James mo Teresa Gonzalez. Tok tankiu i go long Joan Littleford, Wendy Rich Orloff, Jim Knox Allanson, Sally Baker mo Vanuatu Society for Disabled People, we oli bin go tru long pepa ia mo givim ol gudfala tinktink blong olgeta abaot ol samting insaed long buk ia. Spesel save mo skil blong Joseph Siri i kamaot klia long ol droing long buk ia.

Plante save long pepa ia i kamaot tu long ol pepa olsem: *the National Quality Framework for ECCE 2012, the Inclusive Education Policy and Strategic Plan 2010-2012, the Vanuatu Childhood Care and Education Policy (2010), the Vanuatu Early Learning and Development Standards and the Vanuatu K to 3 Curriculum.*

Jenrol lukluk

Kavman blong Ripablik blong Vanuatu hemi bin introdiusum **Inklusif Polisi blong Edukesen [The Inclusive Education Policy]** long 2010. Polisi ia hemi stap talem se:

Kavman...hemi luksave se everi pikinini, nomata se oli gat ol difren abiliti, oli gat sem raet blong go long skul, mo bambae hemi wok blong putum wan polisi blong inklusif edukesenblong Vanuatu, stat long kindagateni ko antap.

Stampa tingting long polisi ia hemi stap meksua se ol pikinini we oli gat sam disabiliti oli gat ful raet blong blong ko long skul. Wan impoten pat blong polisi ia i blong aedentifai o hao blong luksave kwik taem sipos wan pikinini i gat wan spesel nid mo wanem aksen blong tekem kwik taem blong helpem pikinini ia.

Loa blong Edukesen No. 21 blong 2001 hemi fes loa long Vanuatu we i stap blokem diskriminesen long saed blong disabiliti. Edukesen Akt i talem se, “Everi skul i no save stopem pikinini blong kam long wan skul from jenda blong hem(boe/gel), rilijen blong hem, sitisen, kala blong skin, lanwis o disabiliti blong hem.” Ministri blong Edukesen long Vanuatu hemi sapotem strong fasin blong tritim everiwan I semak mo i mas kat raet blong tekem pat long everi samting. Oli stap enkarejem ol tija blong oli mas lukaotem gud mo mas mitim nid blong evri studens.

Dokumen ia i blong usum olsem riding bakgraon blong Trening pepos blong sapotem ol tijas blong andastanem se tijing blong olgeta i mas mitim nid blong evri pikinini.

Gaed ia ino save karem ples blong ol advaes, fasin blong skelem o blong faenemaot wan samting we ol profesenol oli tren from blong jajem wei we ol niu bon bebi, ol bebi we oli stat blong wokbaot mo ol pikinini blong Kindagaten oli stap gru mo dvelop.

I kat tu wan jeklis long buk ia blong usum wetem ol pikinini mo ol papa/mama afta we oli bin wajem ol pikinini. Sapos i kat nid blong sanem wan pikinini i go long helt klinik o dokta, mbae oli shud mekem kwiktaem blong givim moa janis mo help long pikinini ia.

Wanem nao mining blong toktok ia ‘inklusen’ ?

Inklusen hemi stap tokabaot ol fasin blong sem mak valiu, tritmen mo ol oportuniti blong ol olgeta we oli gat ol difren disabiliti. Ingklusen hemi fasin blong akseptem mo luksave ol man we oli gat ol defren gudhan. Taem yumi stap promotem inklusen blong ol pikinini mo ol bigman we oli gat disabiliti, yumi stap promotem fasin blong luksave ol stamba raet blong ol man, woman mo pikinini.

Kavman blong Vanuatu hemi stap usum toktok ia “ol man wetem disabiliti” blong mekem i klia se olgeta oli man o woman we oli semak olsem yumi nomo. Disabiliti blong olgeta i no soemaot ril man we i stap insaad be i soemaot pat blong man we man i stap lukim. Blong ademap, long taem blong ol woksops o aktifiti sesen, yumi mas oltaem traem blong talem se ol man wetem disabiliti se “olgeta we oli stap wetem wan disabiliti.” Disabiliti blong olgeta ino difaenem olgeta, be hemi jes wan pat blong hu ia olgeta.

Fasin blong skelem nogud ol pikinini we oli slo blong lanem samting mo gat disabiliti hemi wan baria long plante kantri mo fasin blong tingting oli nogud hemi stap olsem wan long ol bigfala baria blong kasem ekwaliti. Samtaem ol pikinini we oli gat disabiliti oli no gat plante fren, oli harem olsem oli stap afsaed, ol narafala pikinini I mekem fani o jikim olget, mo ol famli blong olgeta oli stap fesem hadtaem long saed blong mane. [The State of the World’s Children, Children with Disabilities, 2013].

Fasin blong plei spot o ol narafala gem i samfala wei we yumi save usum blong daonem fasin blong sem long ol pikinini wetem disability. Hemi impoten blong enkarejem ol pikinini we oli gat disabiliti blong tekem pat long ol pleplei mo spot wetem ol narawan we oli gat sem mak yia, blong mekem se evriwan i luk se oli tekpat long ol aktifiti we sosaeti i stap ting se hemi gud. [Abilities First, Right To Play, 2009, p. 13]. Raet Blong Pleplei i stap talem se fasin blong letem ol pikinini oli joen insaad long ol spot mo pleplei i helpem olgeta blong :

- Gat wan fasin blong laef we i helti mo impruvum helt blong bodi mo tingting;
- Givim janis blong stap wetem ol narafala man mo toktok long olgeta; mo
- Faenem wan wei blong gat kontak wetem ol patisipen evriwan, nomata we oli gat disabiliti o nogat, blong mekem se oli gat andastanding long narawan mo faetem fasin blong no laekem samfala blong tekem pat long ol sosel aktifiti blong helpem evriwan blong andastanem mo daonem fasin blong no lukluk nogud long ol man we oli kat disabiliti

Wanem nao sam long olgeta jalenj we ol pikinini i kat long saed blong lanem samting?

Wanem nao minim blong wan pikinini we i gruap slo? Ol pikinini oli save gruap aot long hem?

Ol skil olsem fasin blong stat blong wokabaot, fes taem blong stap smael long man, mo sakem han blong talem “tata” oli kolem olgeta ‘developmental milestones’, we oli ol saen o mak blong divelopmen. Ol pikinini oli save stap wokbaot long wan rod be bai oli no save kasem en blong rod long sem mak taem. Ol pikinini oli wokbaot long ol difren spid be oli wokbaot evriwan long sem rod mo long en blong dei bambae evriwan i kasem en blong rod. Ol pikinini oli kasem ol ‘milestone’ taem oli pleplei, lanem samting, toktok, mekem samting mo muf (wokbaot fo leg, wokbaot, etc.). Wan long ol developmen dilei emi taem we pikinini blong yu i no kasem wan long ol maelston semak long ol pikinini we oli semak age blong hem. Oltaem bai i gat ol difrenses long ol oda we ol pikinini oli lanem ol skils mo yia we oli lanem ol skils ia long hem, be ol pikinini oli oltaem oli lanem ol skils ia long spesifik stej blong developmen long laef blong olgeta. Sapos wan pikinini i no develop insaed long nomol yia blong hem, i gat ol samting we yu save mekem blong helpem hem. Fulap time, pikininni i no save “gro aot” long wan developmen problem hem wan. Be wetem help, wan pikinini i save kasem ful abiliti blong hem. Hemia i mas kam mein gol blong ol pikinini wetem dilei long saed blong developmen, be i no blong yumi fosem pikinini blong mas kasem semak gols mo ekspektezen olsem ol nara pikinini long semak yia.

Wanem ia fasin blong mekem test long saed blong divelopmen [developmental screening]?

Test blong jekem divelopmen hemi blong faenemaot sapos pikinini hemi gat problem o hemi let blong divelop long ol defren eria blong divelopmen. Taem oli aplaem long stret fasin, ol test blong jekem divelopmen o problem blong fasin long saed blong ol pikinini bifo oli go long praemeri skul oli save help blong impruvum ol risal from oli kasem tritmen kwiktaem. Divelopmen we i let o problem blong fasin we oli no save faenemaot wetem ol test, i inkludum ol disabiliti blong lanem samting, problem blong toktok o lanwis, problem blong pikinini we ino toktok o no wantem toktok [otisim], disabiliti long saed blong tingting, nogud fasin o harem nogud, problem blong harem samting o luk samting o fasin blong spid oltaem [attention deficit hyperactivity disorder (ADHD)].

Wan standet set blong ol kwesten we bai i save help blong aedentifaem samfala problems o dileis ia i stap wetem buk ia. Usum blong kobak long progres blong pikinini wetem ol parens si pos yu tink se pikinini we yu bin obsevem i gat sam long ol problems ia. Sapos tija hemi luksave se wan pikinini i no kasem stret taem blong divelopmen blong hem, hemi gud blong tok wetem papa/mama mo askem help long ol oganaesesen we oli stap sapotem ol pikinini we oli gat disabiliti.

Tugeta wetem papa/mama maet yu disaed blong go luk wan dokta mo/o wan man we hemi save long wan asosiesen we i stap wok wetem ol pikinini we oli divelop slo. Divelopmen olsem i save stap long ol defren eria blong divelopmen, long saed blong sosaeti, harem nogud, lanwis, bodi o save. Tija i mas tingbaot se hemi hadwok blong wan papa/mama i save

Wanem nao sam long olgeta jalenj we ol pikinini i kat long saed blong lanem samting? (Kontiniu.....)

andastanem se maet pikinini blong hem i nidim wan spesel sapot mo tritmen. Wetem help blong ol papa / mama ol tija oli save setemap ol open laen blong komunikesen mo tugeta oli save gaedem mo sapotem nid blong pikinini.

From wanem fasin blong mekem test blong jekem dvelopmen blong ol pikinini hemi impoten?

Taem oli no luksave kwiktaem se sam pikinini oli dvelop slo, ol pikinini ia oli mas wet blong kasem help we oli nidim. Samting ia i save mekem i hadwok long olgeta blong lanem samting taem oli go skul. Taswe hemi impoten blong ol tija oli lukluk bak long tebol blong ol step blong dvelopmen mo wajem ol pikinini truaot long taem blong mekem sua se ol pikinini oli kasem ful save blong olgeta. [Luk Appendix –Ol Step blong ol Dvelopmen blong ol Pikinini]

Wanem nao laning disabiliti?

Ol disabiliti blong lanem samting o problem blong lanem samting, hemi kavremap plante kaen problem. Disabiliti blong lanem samting i no minim se pikinini hemi no gat hed, o no wantem lanem samting. Ol pikinini we oli gat problem blong lanem samting oli no les o no save mekem samting. Oli wok had blong lanem samting be oli lanem samting long wan difren fasin. I tru, oli smat olsem evriwan be nomo ol waea insaed long bren blong olgeta oli difren mekem se fasin blong risivim mo dil wetem infomesen hemi difren. Ol pikinini we oli gat problem blong lanem samting oli luk, harem o andastanem samting long wan wei we i difren. Mo i save mekem se oli faenem i hadwok blong lanem ol niu save mo niu skil, mo hao blong usum. Plante taem ol problem blong lanem samting i stap long saed blong rid, raet, namba, tingting, lisin mo toktok.

Pikinini wetem laning disabiliti i kat janis blong lanem samting mo gat sakes long laef

Hemi had blong fesem save se pikinini i gat problem blong lanem samting. Ol tija o papa/ mama oli no wantem luk se ol pikinini oli faenem i had wok long skul o ol narawan oli spolem o mekem nogud long olgeta. Ating wan papa/mama i stap tingbaot wanem nao fiuja blong pikinini blong hem, o wari abao olsem wanem pikinini blong hem bambae i save finisim skul blong hem. Plante taem ol papa/mama mo ol tija oli wari se sapos oli poenemaot had taem we wan pikinini hemi fesem blong lanem samting, maet ol narawan oli stap kolem pikinini i “slo” o putum hem long wan klas we ino gat tumas hadwok nomata se i klia se pikinini hemi gat gudfala save mo skil long samfala eria blong lanem samting be ino long ol narafala wan.

Impoten samting blong tingbaot hemi se ol pikinini we oli gat disabiliti blong lanem samting oli smat olsem ol narafala pikinini be bambae i nid blong tijim olgeta long wan wei we i stret long spesel fasin blong olgeta blong lanem samting. Maet hemi tekem taem blong andastanem olsem wanem wan pikinini we i gat wan disabiliti blong i save lanem samting long bes wei. Hemi olsem yu traem blong openem doa we i lok taem yu gat plante difren ki. Hemi tekem taem blong traem evri ki kasem taem we yu faenem stret wan blong openem, be taem yu faenem, mbae doa i open. Disabiliti blong wan pikinini blong lanem samting hemi olsem lok we yu nidim blong faenem ki blong hem.”

Wanem nao sam long olgeta jalenj we ol pikinini i kat long saed blong lanem samting? (Kontiniu.....)

Taem tija i stap lanem mo abaat ol difren disabiliti mo ol laning problem blong wanwan pikinini bai tija ia i save helpem blong mekem rod i klia blong pikinini i save kasem gud skul long fiuja blong hem.

Oi saen mo ‘ol samting we i kosem’ ol disabiliti mo problem blong lanem samting

Taem yu stap saspekte se wan long ol pikinini long Kindi blong yu hemi nidim spesel help, plis yu no wet blong faenem sapot. Sapos yu muv kwiktaem, bambae pikinini i gat gudfala janis blong kasem ful save blong hem.

Oi problem blong lanem samting oli luk difren tumas long wan pikinini I go long wan narawan. Maet wan pikinini hemi faenem i had blong save ridim ol toktok be hemi save andastanem ol stori we oli stap ridim long hem, o wan narawan i laekem ol buk be hemi no save andastanem ol namba. Narawan bakegen, maet hemi gat problem blong andastanem wanem we ol nara-fala pikinini man/woman oli stap talem o tokbaot. Oi problem ia oli difren bigwan , be evriwan long olgeta oli ol problem blong lanem samting.

Hemi no isi oltaem blong faenemaot ol disabiliti blong lanem samting. From we i gat ol difren kaen problem, ino gat wan woning saen nomo we i mekem se yu save luksave se i gat wan problem. Be i gat samfala woning saen blong givim woning we oli stap kam antap oltaem bitim ol narawan, hemi dipen long yia blong ol pikinini. Sipos yu luk save ol woning saens ia, bai yu save aedentifaem stret laning disabiliti eli mo yu save hariap blong faenem ol wei blong kasem help kwiktaem long pikinini ia.

Jeklis ia we i stap daon hemi stap soem samfala **red flag (woning saen)** we oli stap kam antap oltaem long saed blong ol problem blong lanem samting. Tingbaot se ol pikinini we oli no gat problem blong lanem samting, olgeta tu oli save fesem sam long ol problem ia long eni taem. **Taem blong wari hemi taem we i gat wan samting we ino stret i stap hapen oltaem** long fasin we pikinini i stap lanem samfala skil o wok. Lukluk gud long pikinini we i save mekem gud samfala wok be hemi fesem had taem wetem samfala difren kaen wok. Raetem daon wanem i stap hapen blong yu save lukluk gud long hem.

Oi saen mo ol samting we i kosem laning disabiliti long ol pikinini long Kindi

- No save saonem gud ol wod
- Miksimap lef mo raet
- Kat trabol blong faenem stret wod blong usum
- Hadwok blong talem ol toktok we oli finis semak [rhyming]
- Hadwok blong lanem alfabet/a,b,c, ol namba, kala, sep, mo dei blong wik
- Faenem i had blong folem ol daerekseen o ol rul

Wanem nao sam long olgeta jalenj we ol pikinini i kat long saed blong lanem samting? (Kontiniu.....)

Wanem nao mining blong Eli Aedentifikesen long ol yang pikinini?

Oli tokbaot plante long pepa se ol fasfala yia blong pikinini oli impoten tumas long saed blong divelopmen blong hem mo fasin blong lanem samting. Mo tu oli tokbaot plante long pepa se hemi impoten tumas blong faenemaot eli mo tekem aksen kwiktaem sapos pikinini hemi gat sam problem o hemi slo blong divelop, mo tu olgeta we oli stap long denja blong kasem disability o ol dilei o tingting l slo.

Eli aedentifikesen mo aksen i mas kam pat blong sistem blong edukesen mo helt. Eli aedentifikesen mo aksen i save helpem ol tija blong sendem ol pikinini taem oli smol iet blong jekem olgeta bakegen mo tekem moa aksen sapos i gat nid.

Ol tul blong testem o jekem ae mo sora, evri papa/mama oli shud save karem mo tu save jekem olsem wanem pikinini hemi stap divelop agensem ol step blong divelopmen, olsem fasin blong stanap, wokbaot, toktok mo holem ol samting [The State of the World's Children: Children with Disabilities, 2013, p.27].

Disabiliti blong lanem samting i stap minim ol kaen difren problem we i save spolem fasin blong kasem samting, prosesem infomesen, oganaesem samting, fasin blong tingbaot ol samting, andastanem mo usum infomesen we i stap kamaot long maot o no kamaot long maot. Ol problem ia oli stap spolem fasin blong lanem samting long wanwan pikinini we i save soem long narawai se hemi gat wanem hemi nidim blong save tingting mo/o givim tingting blong hem.

I gat ol difren disabiliti blong lanem samting, sam oli no bigwan tumas, sam oli bigwan, mo oli save spolem fasin blong kasem mo usum wan o plante long ol skil we oli stap long lis ia:

Wanem nao sam long olgeta jalenj we ol pikinini i kat long saed blong lanem samting? (Kontiniu.....)

- **Toktok Lanwis:** Spolem fasin blong lisin, toktok, andastanem toktok mo tingbaot ol samting we oli stap tokbaot. Ol problem ia i save inkludim ol problem blong harem ol saon mo olsem wanem oli difren, seperetem saon long noes raon long hem mo save hao blong folem saon [sequencing] (ol narafala toktok we oli stap yusum hemi problem blong prosesem wanem hemi harem oproblem blong andastanem toktok we i kamaot long maot).
- **Fasin blong Rid:** Spolem fasin blong luk mo andastanem [decoding], save long saed blong raetem toktok olsem we hemi harem [phonetic knowledge], fasin blong luk save wan toktok, andastanem toktok mo holem taet mo tingbaot ol samting we hemi luk long ae blong hem. Ol problem oli save inkludim ol problem blong luk mo andastanem mesej olsem seperetem ol sep (eksapol, luk save olsem wanem ol leta we oli gat semak sep oli difren), putum ol leta o toktok long stret oda (eksapol, putum ol leta bakwod), mo seperetem pikja mo ples raon long hem (ol narafala toktok we oli usum hemi 'dyslexia' o problem blong luk mo andastanem mesej – visual-perception problem).
- **Raetem Lanwis:** Hemi inkludim ol problem blong oganaesem ol tingting o ol samting blong putum long raeting, no raetem toktok long stret wei, sintaks [syntax] mo grama [grammar].
- **Fasin blong usum namba o Matimatiks:** Spolem fasin blong ademap namba mo ol samting olsem mo fasin blong stretem problem. Ol problem ia i save inkludim fasin blong ol namba long oda we i no stret (bakwod), hao blong tingbaot ol simbol blong kwantiti mo mistek long saed blong raetem ol namba o laen blong namba long pepa (narafala toktok we oli usum hemi 'dyscalculia').

OI Spesel Laning Disabiliti

Plante taem oli grupum ol disabiliti blong lanem samting long skul – eria mo eria skil. Long skul, ol kaen problem weoli stap luk oltaem hemi long fasin blong rid, raet o namba [maths].

Disabiliti long saed blong rid (Dyslexia)

I gat tu (2) kaen blong laning disabiliti we yumi save faenem insaed long riding. Ol stamba problem blong rid oli hapen taem i gat problem blong andastanem wanem rilesensip bitwin saon, leta mo ol wod. Ol problem blong andastanem wanem we oli ridim i hapen taem pikinini ino save andastanem mining blong ol wod, sentens mo plante wods olsem paragraph.

Oi saen blong problem blong rid oli stap inkludim ol problem blong:

- Luk save ol leta mo wod
- Andastanem ol wod mo ol aedia
- Spid blong rid mo luk save kwik taem ol toktok
- Jenrol skil long saed blong plante ol difren toktok [vocabulary]

Wanem nao sam long olgeta jalenj we ol pikinini i kat long saed blong lanem samting? (Kontiniu.....)

Disabiliti blong lanem samting wetem Namba [Math] (Dyscalculia)

Disabiliti blong lanem samting long saed blong namba [math] hemi jenis bigwan folem save / strength o wiknes blong pikinini. Problem blong save blong wan pikinini long saed blong namba [math] bambae i difren sapos hemi gat problem blong lanem wan lanwis o wan problem blong ae o wan problem blong folem stret oda blong samting {sequencing}, o okenaesesen.

Wan pikinini we i gat problem blong lanem namba, maet hemi save gat problem blong tingbaot mo oganaesem ol namba, ol saen (+, -, x) mo "stret" namba (olsem $5+5=10$ o $5\times 5=25$). OI pikinini we oli gat problem blong lanem namba maet oli save gat problem tu wetem ol prinsipol blong kaontem samting (olsem blong kaontem samting long 2s o kaontem samting long 5s) o gat problem blong talem taem.

Disabiliti blong lanem samting long saed blong Raet (Dysgraphia)

Disabiliti blong lanem samting long raeting hemi save minim problem blong raet wetem han o fasin blong usum hed blong andastanem mo putum tugeta infomesen. Stamba problem blong raet hemi minim problem blong fomem ol toktok o leta wetem han. Problem long saed blong putum filing o tingting blong hem long raeting I stap soemaot se pikinini I stap trae had blong putum o okenaesem wanem we hemi stap tingting I ko long pepa.

OI saen we i soem se pikinini i gat laning disabiliti long saed blong raetem lanwis i stap kamaot ol taem long long taem we pikinini i stap wantem raet. Olgeta saen ia i stap inkludim ol problem blong :

- Raet long fasin we hemi kiln mo klingud
- Kopi stret ol leta mo toktok
- Spelem stret ol wod
- Oganaesem mo putum tugeta ol tingting i ko long raeting

Laning disoda i no afektem nomo ol skil blong pikinini long saed blong rid, raet, mo mekem math. I gat ol nara kaen laning disabiliti tu we i involvem difikelti wetem moto skil (muvum bodi) ol skil blong gat spid blong mekem samting (muvmen mo kodinesen), andastanem ol toktok o samting we man i stap tokbaot, talem difrens bitwin olgeta difren saons, mo traem blong mekem ripot long wanem we pikinini i bin lukim wetem ae blong hem.

Disabiliti blong lanem samting long saed blong muvum bodi (Dyspraxia)

Problem blong muvum bodi iminim ol problem blong muvmen mo kodinesen blong wan pikinini sipos hemi developem ol smol moto skil blong hemi save mekem ol samting olsem katem gud pepa, raetem samting) o bigfala masel mo bone blong save ronron, jamjam). Samtaem oli stap talem se wan'motor'disabiliti hemi olsem wan "output" aktifiti, minim se problem wetem infomesen we i kamaot long bren. OI Step long Developmen blong ol Pikinini

Ol infomesen daon ia oli adaptem olgeta long *Stret Praktis blong Developmen, Long Program blong Edukesen blong Eli Jaelhud, Sevesem ol Pikinini Stat long taem we oli Bon kasem 8 yia, Nambatri Edisen.* [Developmentally Appropriate Practice, In Early Childhood Education Programs, Serving Children from Birth through Age 8, Third Edition].

Long Vanuatu ol janis blong lanem samting oli difren bigwan truaot long ol provins mo komuniti mo from risen ia i gat wan gap long saed blong sakes bitwin ol difren ples we ol man oli laef long hem. Taswe hemi impoten se fokas long edukesen blong ol yang pikinini hemi blong mekem se gap hemi kam smol mo mekem sua se evri praktis blong tijing oli stret long yia mo divelopmen blong wan wan pikinini. Ol tija we oli save mo andastanem ol stret praktis blong divelopmen, oli save mekem samfala tingting abaot wanem wan pikinini hemi sud save mo save mekem long wan wan yia. Sipos pikinini hemi no save mekem samfala praktis, tija i save wajem olgeta klosap mo tu toktok wetem ol papa/mama blong mekem sua se ol pikinini oli kasem spesel sapot.

Ol wan saed toktok mo smol hop long ol pikinini we oli gat disabiliti oli no mas blokem fasin blong givim gudfala prokram long ol Kindy long Vanuatu.

Ministri blong Edukesen hemi bin divelopem wan risos buk we taetol blong hem i Eli Lan-ing mo Developmen Standet [Early Learning Development Standards] (2010) we hemi wan stamba dokumen blong leftimap fasin blong rere blong go skul mo tu blong lukluk long ol nid blong ol pikinini we oli gat spesel nid tru long fasin blong jenjem ol program blong Kinda blong save helpem wan pikinini wetem disabiliti.

Evri tija blong Kindy mo ol papa/mama oli sud save olsem wanem ol pikinini oli lanem samting mo ol stret step blong divelopmen long laef blong pikinini.

Taem we pikinini hemi stap gruap hemi impoten blong luk se:

- Ol smol bebi/yang pikinini (0 kasem 9 manis) oli wantem sekiuriti
